All Natural Trace Minerals

Our Rock Salt Crystals easily flow, are brine washed, and kiln dried. Naturally pink and easy to blend with ingredients.

Rock Salt Crystals are mined from an underground natural mineral deposit, separated to ensure a clean high purity product, dried to remove moisture, and screened to size. Available in 50-lb bags

Feeding Directions:
Offer consistently as free-choice with readily available fresh water.

Our Sodium Chloride (98.0%) offers these naturally occurring trace minerals: calcium, copper, iodine, iron, magnesium, manganese, phosphorus, potassium and sulfur.
