

IntegriBlend Plus

IntegriBlend Plus

IntegriBlend Plus is a blend of liquid magnesium chloride and a concentrated engineered complex sugar. It's an all-natural, environmentally friendly solution for gravel road stabilization and dust control. ***IntegriBlend Plus*** is eco-friendly, but it's also budget smart. ***IntegriBlend Plus*** is applied topically and provide enhanced surface stabilization through its enhanced adhesion properties. ***IntegriBlend Plus***'s hygroscopic properties naturally capture moisture from the air keeping the road damp and dust-free for a healthier environment and a safer road.

IntegriBlend Plus is ideal for dust control and surface stabilization on base courses with fewer plastic materials. The additional binding capabilities offer a longer lasting road surface compared to typical mag chloride blends. Typical application rates for topical dust control range between .25-.5 gals/s.y. and can vary depending on the base material and previous dust control applications.

Applications include gravel roads, parking lots, storage areas, and agricultural access roads. ***IntegriBlend Plus*** can be applied by GMCO Corporation or delivered to your site in 4,500-gallon truckload quantities.
